Lattice

| We will prove that | t (Eq(A); S) is | s a lattice | | |
|---------------------------|-------------------|--------------------|---------------------|--------------------|
| with Eq(A) bein | g the set of all | equivalence relati | ions on A | |
| and A being a | an arbitrary set. | | | |
| | by showing that | t Pand Q hold fo | or any two elements | X and Y in Eq (A). |
| def. P <=> the join of | X and Y is (| X ° 4)* | | |
| def | f X and Y is X | | | |

proof of P

| Nina Gassner |
|---|
| proof (I): |
| σεοοπ |
| (=> ∀x ∀y ((x,y)∈ O → (x,y)∈ O ∘ π)) universal instat. |
| ((x, y) ∈ o → (∃₂((x, ₂) ∈ o ∧ (₂, y) ∈ π))) |
| $(=((x,y)\in O \rightarrow ((x,y)\in O \land (y,y)\in \Pi))$ reflexivity of Π |
| <=> ((x, y) ∈ o → (x, y) ∈ o) |
| <=> ((x, y) & o v (x, y) e o) |
| The last statement is trivially true. |
| Thus, $\phi \subseteq \phi \circ \pi$. |
| The same explanation works for the proof of $\pi \subseteq \circ \circ \pi$. |
| |

| As | all | X and | Υ | in E | Q (F | J) c | re | equ | ivale | nce | ге | loti | ons, | it | als | o h | olds | tho | † X | ΛΥ | is an equivalence relation on A by (i |
| Thu. | s, | XaY | ϵ | g (A | ١) | (ii) | | | | | | | | | | | | | | | |

| (iii) (=> Y Z((Z € EQ(A) \ Z ⊆ X \ Z ⊆ Y) -> Z ⊆ X ∩ Y) |
|---|
| proof by contradiction: |
| Suppose that (iii) was false. |
| T(iii) (=> = Z (Z \in Eq (A) A Z \in X \in Y A Z \in X \in Y) exist instant. |
| => Z S X ^ Z S Y ^ Z \$ X ^ Y |
| (+> Va(a∈Z →(a∈ X ∧ a∈ Y)) ∧ Z ⊈ X ∩Y definition of n |
| ⇒ Va(a∈Z → a∈XnY) A Z & XnY |
| => Z S X \ \ \ Z \ X \ \ \ \ Z \ X \ \ \ \ \ \ |
| The last statement is false. Thus, the assumption must have been false. |
| Therefore, (iii) must hold. |
| (iv) def. XnY = X x XnY = Y |
| proof of (iv): |
| $X \cap Y \subseteq X \Leftrightarrow \forall_X (x \in (X \cap Y) \rightarrow x \in X)$ |
| <=> ∀× ((×∈ X ∧ x∈ Y) → x∈ X) |
| ∀x (¬(x∈ X ∧ x∈ Y) ∨ x∈ X) |
| (=> ∀× (× & × ∨ × ∈ Y ∨ × ∈ ×) |
| <=> ∀× (×€ Y v T) |
| <=> ∀ _× (T) |
| The last statement is trivially true. |
| |
| Thus, XnY S X holds. |
| The same argumentation also works for XnY SY. |
| Thus, (iv) holds. |
| By (ii), (iii) and (iv): Q holds. |
